Primary (#FF0066) – This vibrant pink conveys energy, excitement, and sweetness, perfectly reflecting the indulgent and fun nature of the desserts. It draws attention and encourages interaction, making it ideal for highlights, headings, or call-to-action buttons.

Secondary (#FFE6FF) – A soft pink that complements the primary color, creating a gentle, welcoming atmosphere. It adds warmth and friendliness to the website, enhancing the user's visual experience without overwhelming them.

Background (#FFESEDE) – A light, creamy tone that evokes comfort and sweetness, similar to the feeling of enjoying a dessert. It provides a neutral backdrop that allows other colors and content to stand out clearly.

Dark (#212529) – A deep, nearly black shade used for text and key elements to ensure readability and contrast against the lighter background. It maintains professionalism while balancing the playful pink tones.

Confirm (#4CAF50) – Green is psychologically associated with positivity, success, and "go" signals. It's ideal for confirmation buttons or success messages, reassuring users and guiding them confidently.

Cancel (#F44336) – Red signals caution or errors, making it intuitive for cancel buttons or warnings. It stands out clearly against the softer colors, reducing the chance of mistakes.

Button Hover (#7C6152) – A warm, earthy brown used for hover effects adds subtle sophistication and visual feedback, creating a tactile, engaging user experience.
